

## **RE-ROOFING PROJECT APPROVALS REQUIRED (5/12/11)**

There have been instances of roof replacements being started without the required project request approval from the Architectural Control Committee (ACC). This is a Covenant violation. Homeowners are reminded that completed Homeowner's Project Approval Request Forms must be submitted and approval obtained prior to the start of any re-roofing project. Project requests must include the neighbor's signature form signed by adjacent neighbors as defined on the forms. The Homeowner's Project Approval Request Forms are available on the CKS/E HOA web site, [www.cksearchives.org](http://www.cksearchives.org). As required by the Consolidated Covenant Rules and Regulations, storage sheds must also be re-roofed with the same roofing product that is used on the house. If you have any questions, please call any Board/ACC member or send an email to the ACC chairman at [accchairman@gmail.com](mailto:accchairman@gmail.com).
